	“Current Concerns That I Deal With in the Field”	9
	Diarrhea in the Spring of 2008	9
	Diarrhea Prevention and Treatment	10
	Feed Issues of 2008	10
	The Owner and the Veterinarian	14
	Veterinary Opinion Concerning Veterinarians and the Alpaca Industry	16
	Alpaca Research Foundation (ARF) – Historical Review and Update	17
<b>BASICS</b>	Camelid Quarantine: Necessary or Unnecessary	21
	Bio-Security ( <i>Dr. Pat Long responds</i> )	25
	New Alpaca Purchases	27
	Pre-Purchase Exam	29
	Reasons to Call the Veterinarian	32
	Chart for Basic Information	32
<b>BREEDING</b>	The Breeding Alpaca	33
	The Male Alpaca	33
	The Female Alpaca	34
	When to Breed	35
	Breeding / Drive-By Breedings	36
	The Problem Breeder	39
	The Problem Breeding Female	39
	The Non-Receptive Female	40
	Different Conditions That Cause Non-Receptivity	40
	Dystocia – Human Assisted Delivery	40
	Significance of the Vaginal Speculum Exam	42
	The Infected Female – Case Reports	43
	Mucometria and Intrauterine Segmentalization	43
	Case Study (Infected Uterus)	44
	Dystocia – Human Assisted Delivery	45
	The Alpaca and Oxytocin	46
	The Female That Doesn’t Remain Pregnant	46
	Points to Remember When Breeding Alpacas	47
	The Repeat-Breeding Female	47
	Female Breeding Protocol	49
	Breeding Alpacas: Spring or Fall	49
	Problem Breeders ( <i>Dr. Pat Long responds</i> )	51
	Primiparous Females / Multiparous Females	51
<b>ULTRASOUND</b>	Key to Alpaca Ultrasound	55
	Ultrasound Views	57
<b>BIRTHING</b>	OB Delivery Kit / Cria Care Kit	69
	Normal Birthing	70
	The Alpaca That Strains	71
	The Prepartum Female That Strains	71
	The Postpartum Female That Strains	71
	Prepartum Labor Pains	71
	Uterine Torsion	72
	Correction by Rolling	72
	Birthing	73
	Handling the Overdue Alpaca ( <i>Dr. Pat Long responds</i> )	74

Birthing Positions .....	75
Normal Birthing Sequence .....	79
Twins .....	80
After Birthing: Mother and Cria Assessment .....	81
The Cria .....	81
The Mother / Retained Placenta / The Prolapsed Uterus .....	82
Newborn Evaluation and Care of the Dam ( <i>Dr. Pat Long responds</i> ) .....	83
Evaluation of the Dam .....	86

## **CRIA-RELATED**

The Cria .....	87
The Premature Cria .....	87
How to Deal with the Premature Cria .....	88
The Difficult-Birth Cria .....	90
Cria Seizures .....	90
The Non-Accepting Mother .....	91
The Cria That Strains .....	91
The Orphaned Cria .....	91
Colostrum History / Camelid Plasma .....	92
Plasma .....	93
Recommended Plasma Dosage .....	93
Milk Substitutes / How Much Milk Supplementation .....	94
Cria Supplementation .....	94
Vaccinations / Orphans / Domperidone .....	95
Domperidone Field Study .....	96
Cria Diet .....	98
Causes of Failure to Produce Colostrum .....	98
To Ensure Cria's Colostral Intake Early .....	98
Some Mothers Require Time .....	99
Cria Diarrhea .....	100
Rota-Corona Virus Diarrhea .....	101
Cryptosporidium & Giardia Diarrhea .....	102
Bovine Virus Diarrhea .....	103
Cria Diarrhea ( <i>Dr. Pat Long responds</i> ) .....	104
Birth to 2 Weeks of Age .....	104
2 to 8 Weeks of Age / Coccidia .....	105
Eimeria Macusaniensis (E. mac) .....	105
Corona Virus / Giardia / Cryptosporidium .....	106

## **ALPACA CONDITIONS**

Stress .....	107
Alpaca Stressors .....	107
Stress Prevention / Prevention: Fiber Problems .....	108
Herd Management Decisions .....	108
The Downer Alpaca .....	109
Poisonous Plants .....	111
The Straining Gelding or Male .....	112
Heat Stress and Medical Conditions that Present Similar Symptoms .....	113
Temperature (°F) + % Humidity .....	113
Meningitis & Encephalitis .....	114
Polioencephalomalacia / Hypophosphatemia .....	115
Noted Clinical Signs of Heat Stress .....	116
Heat Stress Chemistry Panel / Heat Stress Treatment .....	116
Facial Deformities .....	120
Selected Conditions .....	121
Choanal Atresia .....	121

	Megaesophagus	121
	Polioencephalomalacia	122
	The Immunocompromised Alpaca	123
	Geriatric Camelids ( <i>Dr. Pat Long responds</i> )	127
	Ricketts in Alpacas “Hypophosphotemia Syndrome”	128
	Ricketts, Vitamin D and Alpacas ( <i>Stephen Hull, Ph.D.</i> )	131
<b>IMMUNIZATION</b>	General Recommendations for Immunization	137
	Immunization Recommendations from The Ohio State University	139
	Immunization Recommendations from Auburn University	140
	Vaccination and De-Worming Protocols ( <i>Dr. Pat Long responds</i> )	141
	Vaccines	141
	Clostridium Perfringens Type C and D and Tetanus Toxoid (CDT)	141
	Leptospirosis, Rabies, West Nile Virus	142
	Eastern Equine Encephalitis (EEE)	142
	Equine Herpes Virus	143
	Bovine Viral Diarrhea Virus (BVDV)	143
	Internal Parasite Control	143
	De-Worming Protocols for the Willamette Valley	144
	Liver Flukes, Coccidia	144
<b>PARASITES</b>	The 100% Deworming Program	147
	Alpaca Parasites in the United States	148
	External Parasites	148
	Internal Parasites	148
	Protozoa (Coccidia, Toxoplasmosis, Eperythrozoon)	148
	Cestodes (Tapeworms) / Trematodes (Flukes)	149
	Internal Parasite Awareness and Prevention	150
	Alpaca Parasites 2008	151
	Meningeal Worm (Brain Worm)	156
	Dewormers for Alpacas	158
	Sarcocystosis	159
<b>DIAGNOSTICS &amp; PROCEDURES</b>	Alpaca Procedures	161
	IV Catheterization	161
	Blood Collection	161
	Jugular Venipuncture	161
	Endotracheal Tube Placement	162
	Orogastric Tube Placement	162
	Castration	162
	Dentistry	163
	Tooth Root Abscess ( <i>Dr. Pat Long responds</i> )	164
	Tooth Root Infection / Bone Infections	164
	Bone Sequestra / Neoplasia / Retained Baby Teeth	165
	CBC, Chemistry Panel, and Elemental Panel	167
	Procedure for Collecting & Shipping Blood	167
	CBC Hematology Profile	167
